**A COMPANY WHERE EXCELLENCE
IS SYNONYMOUS WITH SUSTAINABILITY**

WELCOME ON BOARD

MCM Rubinetterie, founded in 1991 with registered office in Borgomanero (Novara), is specialised in the production of self closing taps and electronic contactless taps.

Founded by the Margarini family, in over 30 years of business it has achieved important international milestones and is considered a company of excellence among the companies manufacturing bathroom fittings in North-Eastern Piedmont.

MCM Rubinetterie's mission is to contribute to the reduction of water waste in public areas, thanks to solutions that combine quality and cutting-edge design with high-performance technologies.

MADE IN ITALY QUALITY

Our products are sold in over 60 countries around the world, to the global market of manufacturers of bathroom fittings, manufacturers of bathroom fixtures, importers and large distributors.

All our products are made in Italy, starting from highly selected suppliers. This is the most important certainty we offer our customers: the Made in Italy quality of any proposed solutions.

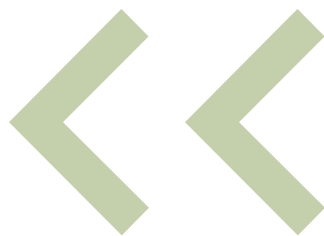

The authenticity of the products is protected by the Made in Italy Italccheck certification mark. As proof of their quality, MCM Rubinetterie products have obtained product certifications of international value. Furthermore, our company is ISO 9001: 2015 certified.

BRANDS AND PRODUCT CERTIFICATIONS FOR THE INTERNATIONAL MARKET

LESS AND BETTER

MCM Rubinetterie believes in a **Less and Better** philosophy. In our solutions we constantly try to **simplify, reduce and optimise**: less, in fact, is better when applied to design, environment and safety.

LESS **WATER**
BETTER **HYGIENE**
LESS **CONTACT**

BETTER **ENERGY**

REDUCING CONTACT MEANS INCREASING HYGIENE

Our range of **ELECTRONIC TAPS**, in addition to having a positive impact on the environment, eliminates the possibility of contagion through contact with the surface of the product. The activation of the water flow through a sensor allows the user to activate it without touching the activation button. A totally hygienic solution, suitable for being applied in all public and crowded areas.

MANAGING TIME MEANS SAVING WATER

Our **TIMED DEVICES**, thanks to advanced technical characteristics, reduce water consumption considerably.

By pressing a button, lever or pedal, the flow is activated and closed after a certain period of time, which can also be defined by the customer.

A technology serving the environment and the community, to help reduce water consumption and waste.

CLASSIC TAP >> **10L/MIN**
SELF CLOSING TAP << **3L/OPENING**
ELECTRONIC TAP << **1L/OPENING**

BETTER ENERGY FROM NATURAL SOURCES

MCM Rubinetteria produces 100% of energy needs from renewable sources.

The company is covered by a **photovoltaic system** of 1000 sqm, thanks to which every day we avoid the emission of 100 Kg of Co2 which, within a year, equals about 150-200 barrels of oil: it is the equivalent of a car traveling 600 km. In addition, we have a **hydroelectric plant** with an average power of 110 kW and a maximum of 250 kW, which can produce from 750 thousand kW to 1 million kW per year.

Here, ecology and attention to the environment are a concrete fact every day.

DESIGN FOR THE COMMUNITY

Spaces open to the public are everywhere, in all cities of the world: schools, stations, airports, shopping centres, offices, public administrations.

Places with the daily passage of big flows of people that, for this reason, require functional bathrooms capable of guaranteeing high levels of hygiene, thanks to long-lasting and vandal-proof products capable of maintaining optimal quality even with massive use.

Our solutions are designed to guarantee high performance, a functional, accessible design and great reliability over time, thus allowing significant water savings and maximum safety.

APPLICATIONS

MCM Rubinetterie products are present in all spaces with toilets open to the public. Our solutions are designed on the basis of the specific use and functionalities necessary for the place where they shall be installed.

SOLUTIONS

INTENDED USE

Our contactless, timed and instant-closing electronic taps are designed for sinks, toilets, showers and large kitchens in public environments and all public areas.

WASHBASIN

WC

SHOWER

INDUSTRIAL KITCHENS

TYPES

A wide range of products equipped with flow limitation devices, with water flow adjustment based on customer requests, vandal-proof and anti-hanging protection systems and timed, thermostatic or progressive cartridges to guarantee water saving and the utmost safety.

SELF CLOSING

Our timed taps can be activated through a lever or pedal button. Furthermore, you can choose between single water and mixers (simple, thermostatic and progressive).

ELECTRONIC CONTACTLESS

Thanks to an infrared electronic device, considerable water and energy savings are obtained and the spread of germs and bacteria is limited: an essential safety for all public areas.

LEVER

The lever can be activated through the use of the elbow, for example in cases you have dirty hands or when it is not possible to use your hands.

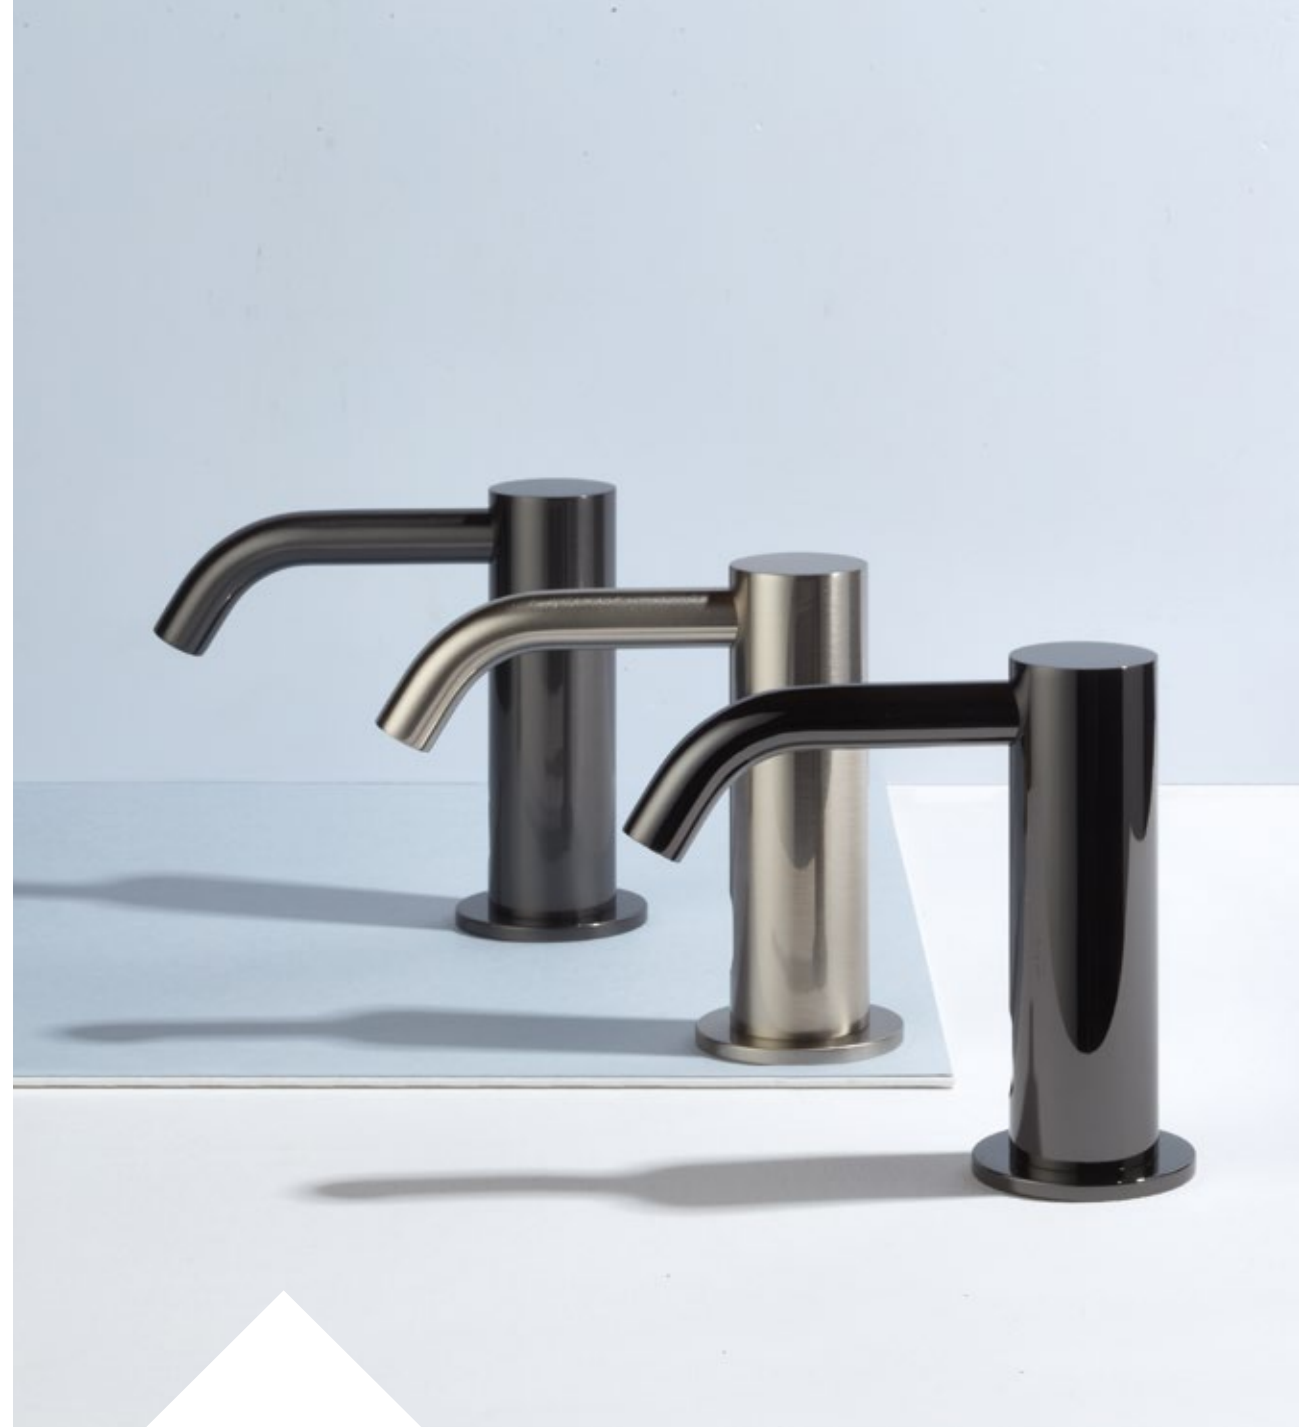

PEDAL

Thanks to the pedal system (contactless) it is possible to activate the mixer without using hands. Ideal for public toilets and workplaces where you try to avoid contact with surfaces as much as possible.

SHOWER SYSTEMS

>> KEY POINTS

ALONGSIDE THE CUSTOMER DURING PURCHASE AND AFTER-SALE PHASE

The service we offer to customers around the world is one of our strengths: certainty on delivery times, quick responses to every request and warranty on all products.

PRODUCTION FLEXIBILITY

Different types of finishes available.
Possibility of customising the product, even with the customer logo.
Guaranteed delivery within 10 days.

RESEARCH AND DEVELOPMENT

We constantly study and develop innovative items to meet the needs of the market.

With large volumes it is possible to make OEM products on request.

TECHNICAL ASSISTANCE AND WARRANTY

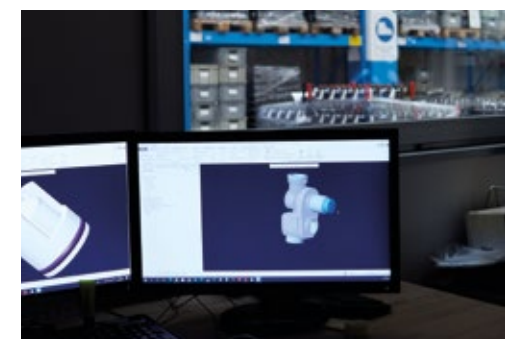

Response to inquiries within 24 hours.
Thirty years of know-how in the sector of bathroom fittings.

Product warranty:

- timed for 15 years
- electronic 2 years

REFERENCE ACCOUNT

Sales Account for each country.
The customer is regularly assisted in all its needs.
Young and highly competent team.

ORGANIZATION

MCM Rubinetterie stands out for its organisation and great attention to quality. All highly qualified personnel follow innovative process logics that are specifically designed to promote productivity and to shorten time-to-market. We applied Lean Production, a production system that aims at full quality by reducing waste until it is eliminated.

Our management style aims at creating excellent and highly competitive standardised processes.

The attention to detail in the work, the careful selection of suppliers and raw materials, the ability to satisfy requests for product customisation and the great drive for innovation make MCM Rubinetterie a reference partner for the global market.

QUALITY AND ATTENTION TO DETAIL IN EVERY PROCESS
